Education

Vellore Institute of Technology 2023 – Expected 2027

B.Tech in Computer Science & Engineering (AI & ML) | CGPA: 8.33/10

Mother Teresa Mission Higher Secondary School, Kanpur

ICSE (Class 10): 88.5% | ISC (Class 12): 77%

Work Experience

Janviba Ventures (Nifty Invest) Jul 2025 – Sep 2025

Web & CRM Development Intern

- Built and maintained **production websites** and internal **CRM dashboards** for 2 client platforms used for daily operations and reporting.
- Added dashboard features and fixed workflow bugs, using **AI-assisted development tools** to speed up debugging.
- Worked directly with the founders to turn business requirements into technical updates and improve reporting.

Technical Projects

Nexus Console – Agentic Graph RAG Assistant GitHub

RAG over 17 Textbooks | Python, LangChain, ChromaDB, BGE Embeddings, Groq, FastAPI

- Indexed **4,300+ chunks** from **17 textbooks** in **ChromaDB** and built **hybrid retrieval** (vector search + **BM25**) with **cross-encoder** re-ranking.
- Added a 16-node **knowledge graph**, **query rewriting** and multi-turn chat history so follow-up questions retrieve the right context.
- Served cited answers from **Llama-3.3-70B (Groq)** through a **FastAPI** backend with a chat UI and endpoint tests.

FinSightAI – Finance & Reconciliation Copilot GitHub

Agentic AI Copilot | Python, LangGraph, FastAPI, PostgreSQL, SQLAlchemy, Pydantic, Pytest

- Built a **LangGraph agent** with 5 **tool-calling** finance functions and a policy-document **RAG** tool, so answers come only from verified database results.
- Designed a reconciliation engine (decimal arithmetic, duplicate detection, **idempotent** postings) on a **34-table PostgreSQL** schema.
- Exposed 13 read-only **FastAPI** endpoints with rule-based **anomaly detection**; wrote **44 Pytest** tests.

Heart Disease Prediction using ML GitHub

Binary Classification | Python, Scikit-learn, Pandas, NumPy, Jupyter

- Cleaned the UCI Heart Disease dataset (13 features) and ran **exploratory data analysis** on feature trends.
- Trained and compared **AdaBoost** and **Random Forest** classifiers to predict heart disease presence.
- Evaluated both models with **accuracy, precision, recall and F1-score** to choose the better classifier.

Technical Skills

Languages: Python, SQL, Java

Frameworks & Libraries: LangChain, LangGraph, FastAPI, Hugging Face, Scikit-learn, Pandas, NumPy, PyTorch, Pytest, Docker

GenAI & AI: LLMs, RAG, Agentic AI, Tool Calling, Hybrid Search (BM25 + Vector), Reranking, Embeddings, Knowledge Graphs, NLP

Data & Tools: PostgreSQL, ChromaDB, REST APIs, Git/GitHub, Groq API, AWS, Oracle Cloud (OCI)

Certifications & Achievements

- **Oracle Cloud Infrastructure Certified Architect Associate**
- **Oracle Agentic AI Foundations Associate**
- Applied Machine Learning in Python – University of Michigan (Coursera)
- AWS Cloud Practitioner Essentials; Cloud Computing – NPTEL
- **1st Place**, Linpack Hackathon (Machine Learning)
- **Winner**, Computer Vision Hackathon (AI Posture Coach)
