

OJUS GUPTA

AI/ML Engineer | Generative AI | Agentic AI

+91 70543 93898 | ojusgupta004@gmail.com | LinkedIn | GitHub | LeetCode

SUMMARY

B.Tech CSE (AI & ML) student with hands-on experience in Machine Learning, Generative AI, NLP, and backend development. Built ML classification pipelines, RAG applications, and a finance intelligence platform. Strong foundation in Python, SQL, data preparation, model evaluation, and AI application development.

EDUCATION

Vellore Institute of Technology, Bhopal

2023–2027

B.Tech, Computer Science and Engineering (AI & ML)

CGPA: 8.33

TECHNICAL SKILLS

Programming & Data: Python, SQL, Java, Pandas, NumPy

Machine Learning: Scikit-learn, Regression, Classification, Clustering, Feature Engineering, Model Evaluation

Deep Learning & NLP: PyTorch, Neural Networks, Hugging Face Transformers, Embeddings

Generative & Agentic AI: RAG, LangChain, LangGraph, LLMs, Prompt Engineering, MCP Basics, Tool Calling

Backend, Cloud & Tools: FastAPI, REST APIs, PostgreSQL, SQL/NoSQL, AWS, SageMaker, Lambda, EC2, S3, ChromaDB, Git, GitHub, Pytest, Docker

EXPERIENCE

Web & CRM Development Intern, Janviba Ventures (Nifty Invest)

Jul 2025 – Sep 2025

- Built and maintained production websites and internal CRM dashboards for two client platforms, supporting business operations and reporting workflows.
- Developed dashboard features and debugging workflows using AI-assisted development tools, accelerating implementation and issue resolution.
- Worked with founders to translate business requirements into technical solutions and improve internal reporting workflows.

PROJECTS

FinSightAI — Finance & Reconciliation Intelligence Platform

GitHub Repository

- Built a FastAPI + PostgreSQL finance platform with deterministic reconciliation, decimal-exact financial arithmetic, duplicate detection, and idempotent ledger postings across a 34-table schema.
- Developed a LangGraph AI Copilot with RAG over reconciliation policies, grounding finance answers in verified database results.
- Implemented rule-based anomaly detection and 13 read-only analytics endpoints, supported by a 44-test Pytest suite.

Nexus Console — Agentic RAG Academic Assistant

GitHub Repository

- Indexed 4,300+ document chunks from 17+ textbooks in ChromaDB for semantic retrieval, using Hugging Face embeddings and sentence-based chunking to preserve context.
- Built a document-ingestion pipeline and used LangChain to orchestrate multi-step questions and generate grounded, citation-aware responses through FastAPI.
- Designed retrieval around relevant passages rather than sending entire documents to the model, supporting focused answers and efficient context use.

Predictive ML Pipeline for Cardiovascular Classification

GitHub Repository

- Built a binary classification pipeline on the UCI Heart Disease dataset, comparing AdaBoost and Random Forest using accuracy, precision, recall, and F1-score.
- Performed preprocessing, feature engineering, and model evaluation to compare classifier performance.
- Won 1st place at a college-level ML hackathon.

CERTIFICATIONS & ACHIEVEMENTS

- Applied Machine Learning in Python — University of Michigan, Coursera
- Oracle Cloud Infrastructure Certified Architect Associate — Oracle
- Oracle Agentic AI Foundations Associate — Oracle
- Cloud Computing — NPTEL | AWS Cloud Practitioner Essentials — AWS
- 1st Place, Linpack Hackathon (ML) | Winner, Computer Vision Hackathon (AI Posture Coach)
